New York, September 28 .- The excitement in Wall street was very great throughout the day, and the events scarcely less important than for many past days. The Committee from the Gold Room, appeinted in the morning, soon reported that the Bank of New York would undertake the clearances of last Friday in the gold room, subject to the following restrictions: That every statement must be

At 3 p.m. the committee reported that the Bank of New York found its clerical force insufficient to clear Friday's contracts in the Gold room without embarrassing its regular operations. The creditor banks have been assessed until the same can be collected. This is years 1838 and 1869. the first real explanation the public has had of the cause of the delay in making settlements with the bankers. It is reported, from this statement, that the currency of the bank has been loaned to parties, and the whole street brought to a dead lock. This afternoon the Committee on Suspensions of the Clearing House regarded the securities handed over to the Clearing House on account of the debtor balance of the Gold Exchange, as adequate to cover the liabilities, and have ascertained that to-morrow the Bank will stand creditor at the clearing house. The Stock Exchange presented a gloomy aspect towards the close of the day, and the panicy feeling was re-
